Oggetto: EAN NEWS: An extraordinary result: italian astroimager Antonello Medugno resolved Pluto-Charon system!

AN EXTRAORDINARY RESULT: THE KNOWN ITALIAN ASTROIMAGER ANTONELLO MEDUGNO HAVE IMAGED THE PLUTO - CHARON SYSTEM!

The Italian astroimager Antonello Medugno, from EAN staff, has made a memorable, never succeeded first in the world has separated the Pluto-Charon system with amatorial instrumentation! The details of the news to Home Page of the portal:

www.eanweb.net

On the left, the image produced in high definition by Antonello Medugno in which the separation between Pluto and Charon is only 0.7'' arcsec. Antonello used for shooting his Meade 14" LX200GPS with about 9 meter efl and a filter R+Ir, Starlight Xpress SXV-H9 as CCD, and a median of 21 frames exposed for 6 seconds. In the to the right, Antonello with his LX200 with whom he made the extraordinary undertaking.
